Dear Families,

March really went out like a lion, but will April come in like a lamb? I guess we will just have to watch the weather.

Our rocks and mineral projects and presentations were a great success. The class shared many exciting and interesting facts.

We also had an enjoyable and educational classroom experience with Mr. Glinski. He shared his artistic talent and helped our class create a ceramic table for the cultural fair. We are thankful he shared his knowledge and time with our class. Those memorable moments will always be cherished.

April is an exciting month. The first week in April is humor week. April is also poetry month and students are encouraged to select their favorite poem or poems to share.

In the area of math, we will focus on fractions, decimals, and percents. We will continue our Wisconsin unit in social studies, and in science we will be focusing on force and motion. In addition, we will be having new incentives to enhance our reading program in April.

I hope you have a wonderful spring recess. I know we will have terrific spring weather. Happy spring! Happy Easter!

Sincerely,

Mrs. Banaszynski
